

FREEDOM TO LIVE YOUR LIFE WITH POD THERAPY

The Omnipod DASH™ Insulin Management System is simple and discreet consisting of just 2 primary parts:-

- A tubeless, waterproof Pod.
- A touch-screen Personal Diabetes Manager (PDM) that you keep nearby when you want to wirelessly programme insulin delivery. Simplicity is just the start of it.

THE POD IS WATERPROOF - NO NEED TO DISCONNECT TO SHOWER OR SWIM

- Stay connected to your basal insulin delivery - and your favourite activities, without being tied down.

UP TO 3 DAYS OF NON-STOP INSULIN DELIVERY TO AVOID 14 INJECTIONS

- Quick and easy remote bolus dosing with the built-in bolus calculator means no need to interrupt daily activities for manual injections.

SIMPLE, COLOURFUL AND INTUITIVE TOUCH-SCREEN

- Easy to use, discreet and familiar smartphone-like technology.

90 DAY OMNIPOD® PROMISE

At Insulet, we believe in the freedom of choice and freedom from tubes.

Choosing a pump is a big commitment, so it is important to make sure it suits your needs. To help you decide, why not try the

Omnipod DASH™ System for 90 days to really feel the benefits of a tubeless pump. If you are interested please speak to your healthcare professional to decide if the Omnipod DASH™ System is a suitable option for you.

GET A FREE SAMPLE KIT

If you are wondering what it feels like to wear a Pod, click on the link below to get a non-functioning sample Pod. You can then consult with your healthcare professional to decide if the Omnipod DASH™ System is a suitable option for you.
